

Motion: for the Track Commission to select teams of composite riders to enter the Team National Championships 2025.

The rationale behind this is to improve numbers at the event and promote rider development.

Riders, especially endurance are now riding more for foreign teams for better road racing opportunities. Allowing these riders to attend the National Team Championships will benefit their development.

Selection for these teams will be from the Track Commission Development Program. Teams will be approved by a committee 2 weeks before the date of the championship.

Riders who are members of UCI Teams, Carded Riders or rider's have attended a European or World Championships in U23 or Elite level in the last 3 years will be ineligible for these teams.

This is to protect the integrity of the event and to prevent "super teams" which will negatively affect the event.

2025 will be a test year and the Track Commission will set up a working group to review the effectiveness of this initiative after the event.
